User's Guide

For IBM/Tandy and 100% compatibles & Apple IIe, IIc, and IIGS Computers

Original game design, programming and graphics
by Jordan Mechner

Produced by Brian Eheler

Music composed by Francis Mechner

Live-action footage modeled by David Mechner,
Michael Coffey, Tina La Deau, and Robert Cook

Special thanks to Robert Cook, Tomi Pierce, Eric Deeds,
Corey Kosak, Roland Gustafsson, Oliver Fellguth and the
Brøderbund Quality Assurance Department

Apple Version
Disk routines by Roland Gustafsson
Sound routines by Kyle Freeman
Title screen by Avril Harrison and Michelle Bushneff

IBM/Tandy Version
Programmed by Lance Groody
Graphics by Leila Bronstein, Avril Harrison, and
James St. Louis
Music arrangement and sound effects by Tom Rettig
Special thanks to Glenn Axworthy, Jeff Charvat and
Chris Jochumson

Table of Contents

IT IS A TIME OF DARKNESS. WHILE THE SULTAN IS OFF FIGHTING A foreign war, his Grand Vizier Jaffar has seized the reins of power. Throughout the land, the people groan under the yoke of tyranny, and dream of better days.

You are the only obstacle between Jaffar and the throne. An adventurer from a foreign land, innocent of palace intrigues, you have won the heart of the Sultan's lovely young daughter. And in so doing, you have unwittingly made a powerful enemy.

On Jaffar's orders, you are arrested, stripped of your sword and possessions, and thrown into the Sultan's dungeons. As for the Princess, Jaffar gives her a choice, and an hour to decide: Marry him—or die.

Locked in her room high in the palace tower, the Princess rests all her hopes on you. For when the last sands drain from the hourglass, her choice can bring only a throne for the Grand Vizier . . . a new reign of terror for his long-suffering subjects . . . and death for the brave youth who might have been . . . **Prince of Persia.**

Getting Started

IBM/Tandy

Prince of Persia can be played with a joystick or from the keyboard. If you have a joystick, be sure it is properly installed.

Note to Tandy owners: **Prince of Persia** *features special digitized sound for the Tandy 1000SL and TL machines. In order to hear these sound effects, the game must be played using the keyboard. If you want to play with the joystick, load the program with the following command: PRINCE STDSND (loads standard sound effects and allows use of the joystick).*

To play **Prince of Persia** you will need at least 512K of memory for EGA, CGA, Tandy or Hercules monochrome graphics, and at least 640K for VGA.

Floppy disk users:

Start your computer with DOS 2.11 or higher. Insert the 3.5" **Prince of Persia** disk or the 5.25" **Prince of Persia** Disk 1 in the desired drive, then select the drive from the DOS prompt and press ENTER. Once the drive is selected, type PRINCE and press ENTER to begin. If you are using the 5.25" disks you will be prompted to insert the Prince of Persia Disk 2 in the current drive. Insert the disk and press ENTER. The opening title sequence will begin, followed by a prologue and a self-running demo.

Hard disk users:

Start your computer with DOS 2.11 or higher. Insert the 3.5" **Prince of Persia** disk or 5.25" **Prince of Persia** Disk 1 into drive A. At the A> prompt, type INSTALL, press ENTER and follow the on-screen prompts. The install procedure will automatically create a directory called PRINCE in your root directory. If you wish to put **Prince of Persia** in another directory, enter the desired pathname during the install procedure.

To play **Prince of Persia** from the hard disk, enter the PRINCE directory, type PRINCE and press ENTER. Once the title screen appears, press a joystick button, or any key to start.

Apple

Put the **Prince of Persia** disk into drive 1, label side up. If you have a joystick, make sure it is connected. Turn on your computer and monitor. The opening title sequence will begin, followed by a prologue and a self-running demo. When you are ready to play, press a joystick button, or any key to start.

Joystick Control

If you use a joystick, it should be the self-centering kind. The joystick buttons can be used interchangeably.

When you boot the disk, the program automatically calibrates itself to match your particular joystick. During play, if your joystick starts to behave strangely, you can recalibrate it by pressing **Control-J**. If this doesn't fix the problem, try adjusting the joystick's trim controls, and pressing Control-J again.

Whenever you press Control-J, make sure the joystick is in its center (released) position.

Running, Jumping, and Climbing

To turn around: Tap the joystick to the left or right.

To run: Push the joystick in the direction you want to go (left or right). Release the joystick to stop.

To take careful steps: Hold down a joystick button and push the joystick in the direction you want to go. You can use careful steps to move right up to the edge of a pit or a suspicious-looking floor section.

To jump up: Push the joystick straight up.

To jump forward: When you are standing still, push the joystick up diagonally in the direction you want to jump.

You can jump farther with a running start. For a running jump over a chasm, back up at least two full strides from the edge. Push the joystick forward to start running, then up to jump. Don't be afraid of pushing the joystick up too early; your character will wait until the last possible moment to jump.

To climb up onto a ledge: Stand facing the ledge and push the joystick straight up. If necessary, use careful steps to position yourself below the ledge.

To hang from a ledge: Press a joystick button and hold it down. To let yourself drop, release the button. To pull yourself up onto the ledge, push the joystick up.

Any time you jump or fall within reach of a ledge, you can grab onto it by pressing a button. Remember—when you release the button, you let go of the ledge.

To climb down from a ledge: Step up to the edge, turn around, then push the joystick down. To hang from the ledge, press a joystick button and hold it down.

To duck: Push the joystick straight down. Release it to stand up.

To pick something up: Stand in front of it and press the button.

Sword Fighting

When you come face to face with an armed opponent, release the joystick. You will automatically draw your sword—if you have one—and go *en garde*. In this stance, the controls are somewhat different:

To strike: Press a joystick button.

To advance: Push the joystick in the direction you're facing (towards your opponent).

To retreat: Push the joystick away from your opponent.

To block your opponent's strike: Push the joystick up just as your opponent is striking. It may take some practice to get the timing right. Watch your opponent carefully, and wait for him to strike.

To stop fighting: Push the joystick down. Once you have put away your sword, you are free to run, jump and climb as usual. Be careful, though—when you are off guard, a single sword blow can kill you. To draw your sword again, press a joystick button.

Practice

IBM/Tandy: From within the game, press SHIFT-L on the keyboard to advance one level.

Apple: From within the game, type SKIP on the keyboard to advance one level.
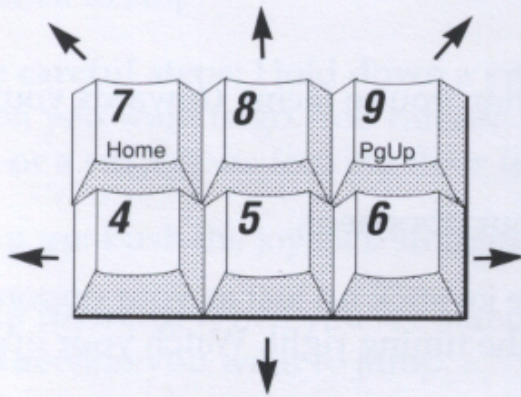

This special feature allows you to practice and improve your running, jumping, climbing and swordfighting skills on levels 2 through 4. When using the practice mode your time remaining is reduced to fifteen minutes and it is not possible to win the game.

When you are finished practicing, press CONTROL-R to start the game over.

Keyboard Control

In keyboard mode, use the following keys in place of the joystick:

IBM:

```
↖        ↑        ↗

  ┌─────┬─────┬─────┐
  │  7  │  8  │  9  │
  │Home │     │PgUp │
  ├─────┼─────┼─────┤
←─│  4  │  5  │  6  │─→
  └─────┴─────┴─────┘

           ↓
```

Button:

```
┌──────────────┐
│ Shift        │
└──────────────┘
```

Apple:

```
↖        ↑        ↗

  ┌─────┬─────┬─────┐
  │  U  │  I  │  O  │
  ├─────┼─────┼─────┤
←─│  J  │  K  │  L  │─→
  └─────┴─────┴─────┘

           ↓
```

Button:

```
┌───┐        ┌───┐
│ ⌘ │   or   │ ⌘ │
└───┘        └───┘
```

## Hints

- To get the maximum distance from a standing jump across a chasm, use careful steps to move right up to the edge of the pit before you jump.

- If you jump a chasm but fall short, you may still be able to grab on to the opposite ledge by pushing a button. Remember, when you let go of the button, you let go of the ledge.

- Every time you block an opponent's sword strike, the force of the blow pushes you back slightly. If you adopt a defensive strategy, you will find yourself steadily losing ground. Try following up a successful block with a strike.

- Test for loose floor sections by jumping up and down.

- You can knock out a loose floor section by standing directly beneath it and jumping up. Try not to be there when it lands.

- There are two kinds of pressure-activated floor plates. One kind raises gates, the other lowers them. With experience, you can learn to distinguish them from ordinary floor sections and from each other.

- Learn to recognize different kinds of potions by sight.

- You can cross a bed of spikes safely by taking careful steps.

- A two-story drop will hurt you. A three-story drop will kill you.

- You never know what you'll find in a dungeon. Don't be afraid to explore, and to experiment. After all, you've got nothing to lose except your life, the Princess, and the entire kingdom.

Life and Death

The row of bullets in the lower left corner of the screen indicates your current strength. Every time you get hurt, you lose one unit of strength. When the last of your strength disappears, you die.

You start the game with three units of strength. (Later on, you may be able to increase your strength beyond this limit.)

Things that cost you one unit of strength include a blow by a guard's sword, two-story falls, and having a section of the floor collapse on your head. Other, more serious accidents can kill you outright.

An opponent's strength is indicated by a row of bullets in the lower right corner of the screen. To kill an opponent, you need to take away all his strength units.

Adventuring

Although this is your first time inside the Sultan's palace, you do have some general information that may help you:

- The Princess is imprisoned in the high tower of the palace. To reach her, you must find your way out of the dungeons, through the palace's main building, and up to the top of the tower.

- Generally speaking, the guards on dungeon duty tend to be the dregs of the Sultan's corps. The more capable ones are usually assigned to the palace's main building. The very best of them—the deadliest swordsmen in the Sultan's employ—are kept for the elite honor guard in the tower, where they are responsible for the personal safety of the Princess and of the Grand Vizier.

- Since your arrival in the city, you have heard some strange rumors. It is whispered that the Grand Vizier Jaffar is a magician, a master of the black arts of enchantment; that his powers are more than mortal. Knowing, as you do, that much of what passes for magic is mere trickery and superstition, you are reluctant to take these stories too seriously. Nevertheless, they don't do much for your peace of mind.

Death and Continuation

When you die, the message "PRESS BUTTON TO CONTINUE" will appear on the screen. Press a button to return to the beginning of the current level.

If you don't press a button, the message will remain on the screen for about 20 seconds, then start to flash in warning, accompanied by a chime. After ten chimes, the game will end and you will be returned to the title sequence.

If you get yourself into a situation where you can find no way out, press **Control-A** to restart the level.

You can continue a game as many times as you want without penalty. Remember, though, the sands in the hourglass are draining away. . . .

To see how much time is left, press the **space bar**.

Disk Access

Because the **Prince of Persia** program needs to access the disk occasionally during play, the disk should be kept in the drive at all times with the drive door closed.

IBM/Tandy
The 3.5" **Prince of Persia** disk or the 5.25" **Prince of Persia** Disk 2 should remain in the drive at all times with the drive door closed. This applies only to floppy disk users.

Apple
At the end of Level 2, the message "TURN DISK OVER" will appear. When you see this message, take the **Prince of Persia** disk out of the drive and put it back in with the label side facing down. Close the drive door, and press a joystick button or any key to continue the game.

You will not need to turn the disk over again until you end the game and return to the title sequence.

Saving Your Game

Once you have reached Level 3, you will have the option of saving your game to disk and continuing it later. To save your current game, press **Control-G** at any time during play. The program will briefly access the drive, then continue with the game.

The next time you boot the **Prince of Persia** disk, instead of pressing a joystick button or any key to start a new game, press **Control-L.** The game will resume from the beginning of the level you were on when you last saved it.

Special Keys

Esc . . . . Freeze frame. Press again for single frame advance. Press any other key to resume play.

Control-J . . . . Selects joystick control. Also recalibrates the program to match your joystick. Make sure that when you press this key, the joystick is in its center (released) position.

Control-K . . . . Selects keyboard control.

Control-R . . . . Ends the game and returns you to the title sequence.

Control-A . . . . Restarts play from the beginning of the current level.

Control-S . . . . Turns off all sound. Press again to turn the sound back on.

Control-N . . . . Turns off the music. Press again to turn the music back on. (Apple only)

Control-G . . . . Saves the current game to disk.

Control-L . . . . Resumes the last saved game. (Press during the title sequence.)

Control-Q . . . . Quit the game and return to DOS. (IBM only)

Space bar . . . . Press to see how much time is left.

About the Author

Jordan Mechner, 25, is the author of the award-winning computer game **Karateka**. Hailed by **Games** magazine as "a software landmark," **Karateka** broke new ground in the use of cinematic techniques to tell a story within a computer game, and has sold over 400,000 copies worldwide.

To achieve the extraordinary realism of the animation in **Prince of Persia,** Jordan studied hours of live-action footage, including swordfighting sequences from classic Hollywood swashbuckling films of the Thirties. Two years in the making, **Prince of Persia** is the culmination of a lifelong fascination with animation, and of ten years of hacking on the Apple II.

A native New Yorker and a 1985 graduate of Yale University, Jordan now lives in San Francisco.

About the Music

The music for **Prince of Persia** uses a "leitmotiv" approach in which each theme is associated with a specific character or idea. The basic themes are: Prince, Princess, Jaffar, Danger, Sword, Shadow, Death, Time, and Magic.

Brøderbund's Limited Ninety-Day Warranty

Brøderbund warrants for a period of ninety (90) days following the original retail purchase of this copy of **PRINCE OF PERSIA** that the program is free from substantial errors or defects that will materially interfere with the operation of the program as described in the enclosed user documentation. This policy applies to the initial purchaser only.

If you believe you have found any such error or defect in the program during the warranty period, call Brøderbund's Technical Support Department at 415/492-3500 between the hours of 8 a.m. and 5 p.m. (Pacific Time), Monday through Friday. Brøderbund technical personnel will attempt to help you correct or avoid the problem. If any such error or defect cannot be corrected or reasonably avoided, Brøderbund will inform you how to obtain a corrected program disk (or, at Brøderbund's option, Brøderbund may authorize a refund of your purchase price).

This warranty gives you specific legal rights, and you may also have rights which vary from state to state.

Disk Replacement Policy

If any disk supplied with this product fails within ninety (90) days of purchase for any reason other than accident or misuse, please return the defective disk together with a dated proof of purchase to Brøderbund Software-Direct®, 17 Paul Drive, San Rafael, CA 94903-2101, for a free replacement. This policy applies to the original purchaser only.

Brøderbund will replace program disks damaged for any reason, whether during or after the ninety (90) day free replacement period, for $5 per disk plus a postage and handling charge of $2.50 per request, as long as the program is still being manufactured by Brøderbund.

Limitations on Warranty

Unauthorized representations: Brøderbund warrants only that the program will perform as described in the user documentation. No other advertising, description or representation, whether made by a Brøderbund dealer, distributor, agent or employee, shall be binding upon Brøderbund or shall change the terms of this warranty.

IMPLIED WARRANTIES LIMITED: EXCEPT AS STATED ABOVE, BRØDERBUND MAKES NO OTHER WARRANTY, EXPRESS OR IMPLIED, REGARDING THIS PRODUCT. BRØDERBUND DISCLAIMS ANY WARRANTY THAT THE SOFTWARE IS FIT FOR A PARTICULAR PURPOSE, AND ANY IMPLIED WARRANTY OF MERCHANTABILITY SHALL BE LIMITED TO THE NINETY (90) DAY DURATION OF THIS LIMITED EXPRESS WARRANTY AND IS OTHERWISE EXPRESSLY AND SPECIFICALLY DISCLAIMED. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

NO CONSEQUENTIAL DAMAGES: BRØDERBUND SHALL NOT BE LIABLE FOR SPECIAL, INCIDENTAL, CONSEQUENTIAL OR OTHER DAMAGES, EVEN IF BRØDERBUND IS ADVISED OF OR AWARE OF THE POSSIBILITY OF SUCH DAMAGES. THIS MEANS THAT BRØDERBUND SHALL NOT BE RESPONSIBLE OR LIABLE FOR LOST PROFITS OR REVENUES, OR FOR DAMAGES OR COSTS INCURRED AS A RESULT OF LOSS OF TIME, DATA OR USE OF THE SOFTWARE, OR FROM ANY OTHER CAUSE EXCEPT THE ACTUAL COST OF THE PRODUCT. IN NO EVENT SHALL BRØDERBUND'S LIABILITY EXCEED THE PURCHASE PRICE OF THIS PRODUCT. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

You are entitled to use this product for your own use, but may not sell or transfer reproductions of the software or manual to other parties in any way, nor rent or lease the product to others without the prior written permission of Brøderbund. You may use one copy of the product on a single terminal connected to a single computer. You may not network the product or otherwise use it on more than one computer or computer terminal at the same time.

For technical support, on this or any other Brøderbund product, call 415/492-3500.
